Education

Indian Institute of Information Technology, Sri City

B.Tech in Computer Science - 8.12 CGPA

Chittoor, Andhra Pradesh

August 2023 - Present

Experience

Backend Engineer Intern – GeoRankers 📄 (Remote)

June 2026 – Sept 2026

- Built the **GeoRankers MCP server** end-to-end in **Golang**, enabling **ChatGPT** and **Claude** to securely interact with GeoRankers capabilities through standardized MCP tools, with authentication (**PAT**) and API integration.
- Integrated **Perplexity AI** into the company's AI search-visibility platform in **Golang**, expanding multi-LLM analysis from 2 to 3 AI models and increasing AI search-result coverage by **~45%** for a standard 5-keyword analysis.
- Integrated external keyword volume APIs and engineered a categorized persistence layer for keyword metrics, reducing repeated API calls by **~80%** while improving lookup performance.
- Developed backend modules for LLM-based source extraction, ranking, and comparative AI search analysis, and implemented **secure payment gateway** integration with robust payment security and validation mechanisms.

MERN Stack Developer Intern – Avijo 📄 (Remote)

Jul 2025 – Sept 2025

- Delivered **2 core MVP modules** for Avijo Alpha, designing and optimizing **30+ RESTful APIs** (service edit/delete, appointments, reviews, profile management) and implementing end-to-end doctor booking workflows across 3 core modules.
- Led backend fixes for critical production systems (**Google Authentication**, HPR/HFR routing, registration), optimizing APIs to cut response time by **20%** (**~250ms to ~200ms**) while resolving production issues via Git collaboration.

Projects

EmployVerse 📄 📄 | *React.js, Node.js, Express.js, MongoDB, Redis, BullMQ, GraphQL, Socket.IO, Docker, CI/CD*

- Built a **distributed microservices job portal** with **3 Express.js backends**, **100+ REST APIs**, GraphQL, and SOAP endpoints, serving applicants, recruiters, and admins with **JWT/session-based 2FA**, freemium paywalls, and **16+ MongoDB schemas** across 3 databases with compound indexes.
- Designed an **AI-powered ATS resume scoring engine** using **Google Gemini 2.5 Flash** and a deterministic **100-point algorithm** across 6 dimensions, plus a job recommendation engine using HuggingFace **all-MiniLM-L6-v2** embeddings.
- Implemented **real-time cross-service chat** using **Socket.IO + Redis Pub/Sub** and asynchronous notifications with **BullMQ**, using **3-retry exponential backoff** to decouple notification processing from HTTP response cycles.
- Reduced redundant database hits with **multi-layer Redis caching** and mutation-triggered invalidation for jobs, profiles, analytics, and candidate data; added **X-Cache headers** for observability and automated daily cleanup of expired listings.
- Deployed **3 microservices** to production with TLS-secured **Upstash Redis**, MongoDB Atlas, and **Stripe PaymentIntents/Checkout Sessions**; implemented **CI/CD pipelines**, **Jest + Supertest** endpoint testing.

Cloud Class 📄 📄 | *Next.js, React, TypeScript, Tailwind, Prisma, Stripe, Mux, Clerk*

- Built a full-stack **LMS** with **15+ API routes** for course CRUD, Stripe Checkout/webhooks, Mux HLS video streaming, per-user progress tracking and implemented **500ms debounced search** to reduce redundant queries.
- Developed instructor tooling for **course/chapter management**, rich-text content, media uploads, publishing validation, and drag-and-drop reordering, secured with **Clerk OAuth authentication** and ownership checks.
- Developed a **teacher analytics dashboard** for course revenue and sales using Recharts, backed by a **7-model MySQL schema** with indexed foreign keys, cascading deletes, and optimized filtering.

Technical Skills

Languages: GoLang, C++, JavaScript, Typescript, Python

Frameworks / Libraries: NodeJS, React, Tailwind CSS, Redux, NextJS, Express, Prisma, BullMQ, Socket.IO

Developer Tools: GitHub, Postman, Kafka, Prisma Studio, Docker, Kubernetes

Databases: MongoDB, PostgreSQL, MySQL, Redis

Cloud / Deployment: AWS (EC2, Lambda, RDS), Azure, Vercel, Render, CI/CD

Core Concepts: OS, DBMS, Computer Networks, OOPS, System Design, Distributed Systems

Achievements and Certificates

- Achieved **1820+** rating on LeetCode and solved **1000+** problems across multiple platforms including Codeforces and GFG.
- Internship Completion Certificate and Letter of Recommendation - Avijo 📄
- Certificate of Appreciation – Tech Team, IIIT Sri City 📄

Responsibilities

- Tech Team (2025–2026):** Designed and maintained institute event websites with responsive UI/UX; contributed to Utkrishtha and Abhisarga (Annual Fest) by implementing key features and improving functionality.
- FSD Team Lead (Jan 2025 – May 2026):** Led a team of 5 for Full Stack Development, driving project execution and mentoring developers across frontend and backend tasks.
